Changes 1.3 evening review

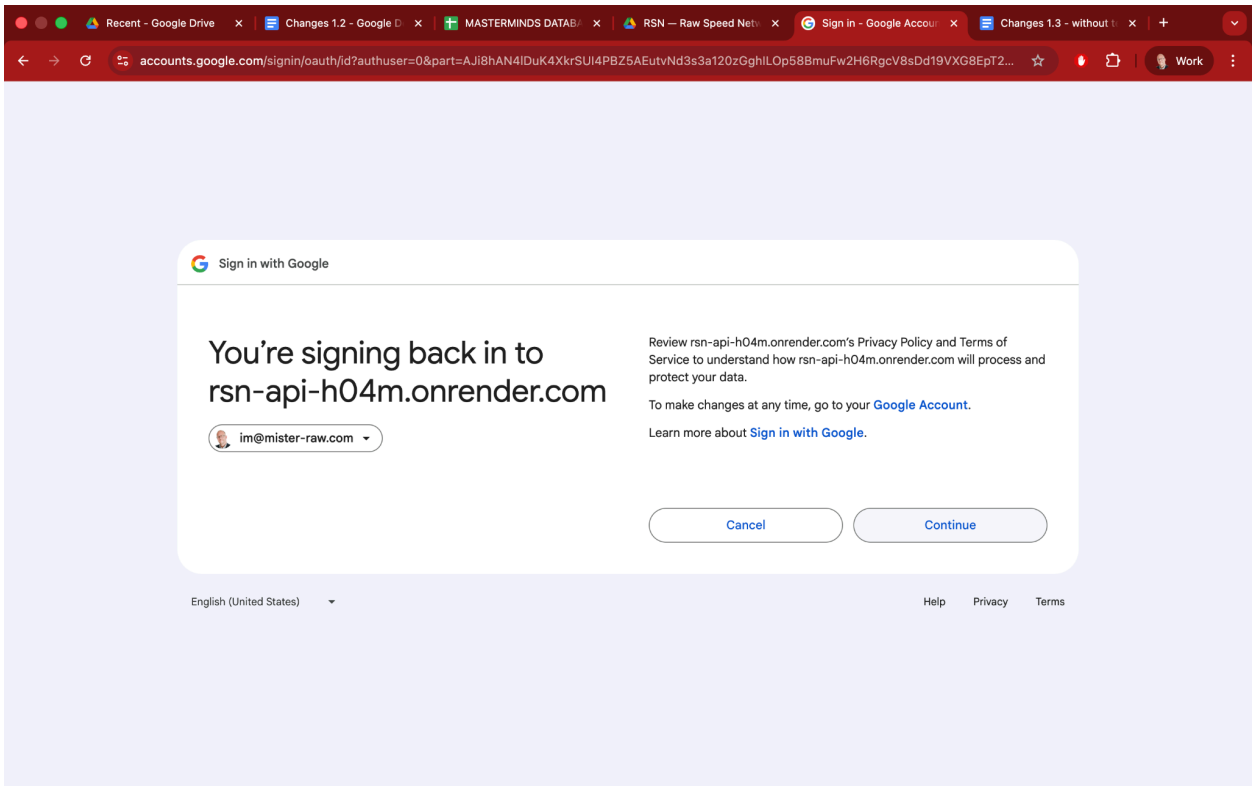
Favicon should be changed to the black sheep

Is all font Sora everywhere?

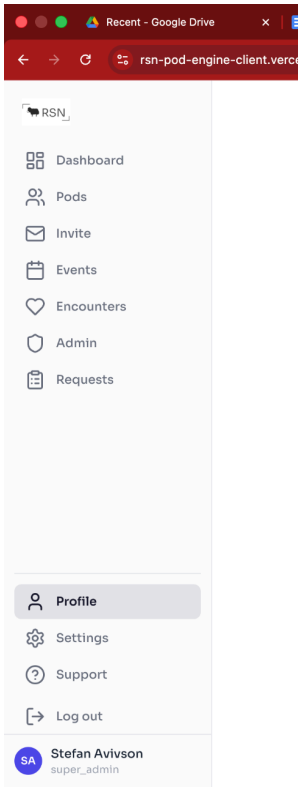
LOGIN PAGE

Delete this text: RSN Access System

When I sign in with google
I everytime need to press twice to get in. Usually, that is only done first time.



LEFT MENU



Dashboard
People (before called encounters)
Pods
(Circles - comes later though - I have not yet refined the looks of it - but should be like “facebook groups or “linkedin groups”
Events
Invite

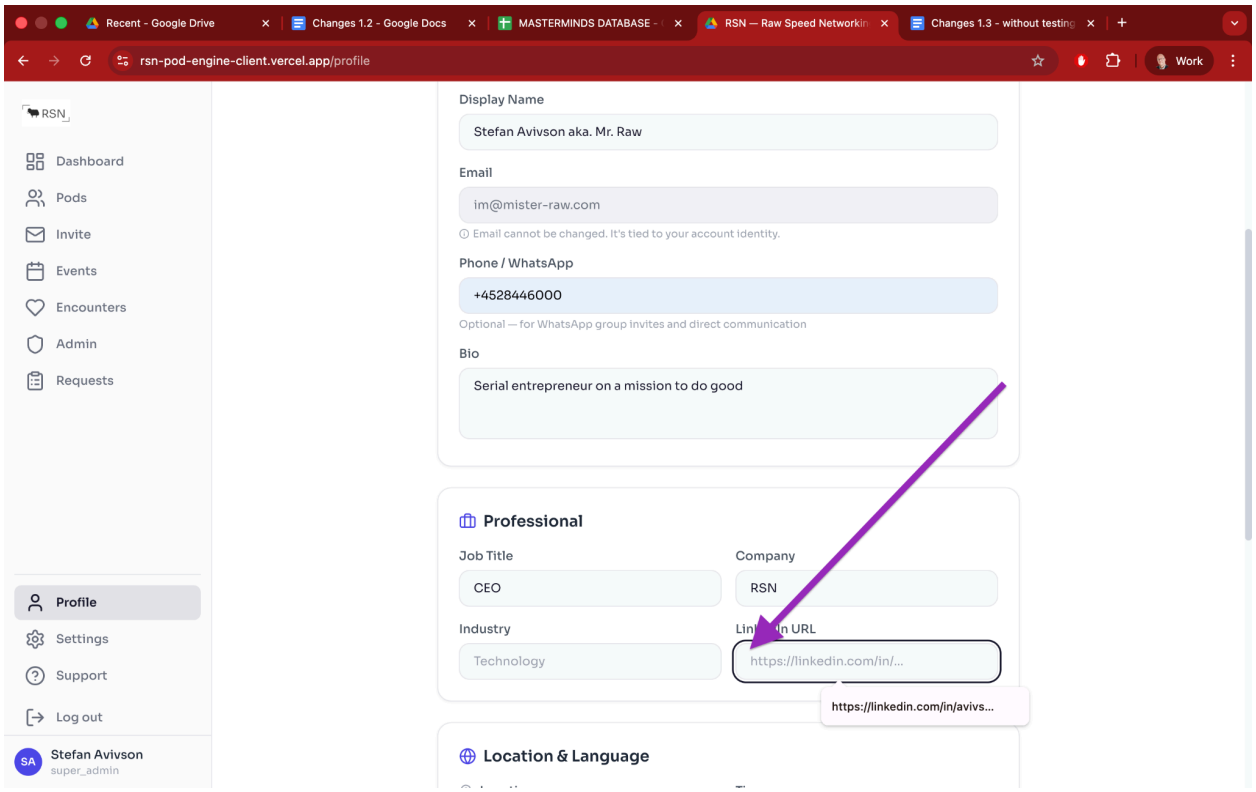
Profile
Settings
Support
Admin
Log out

“Requests” is part of admin - admin has own menu structure

PROFILE

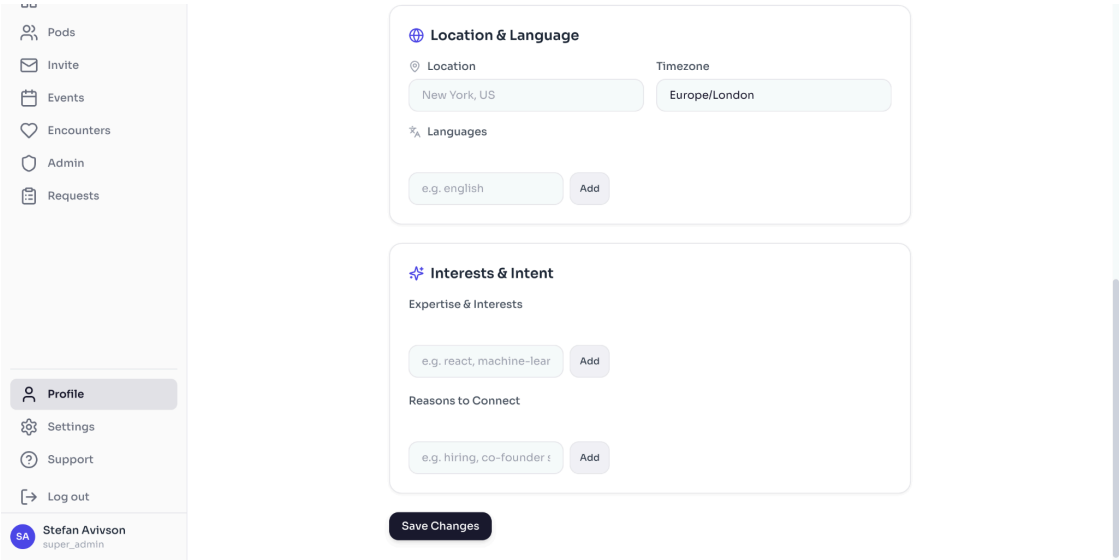
When I upload a picture, it idles out, and then I am reverted to the frontpage

When I press the cell for linkedin, it should be pre-filled with https://linkedin.com/in/

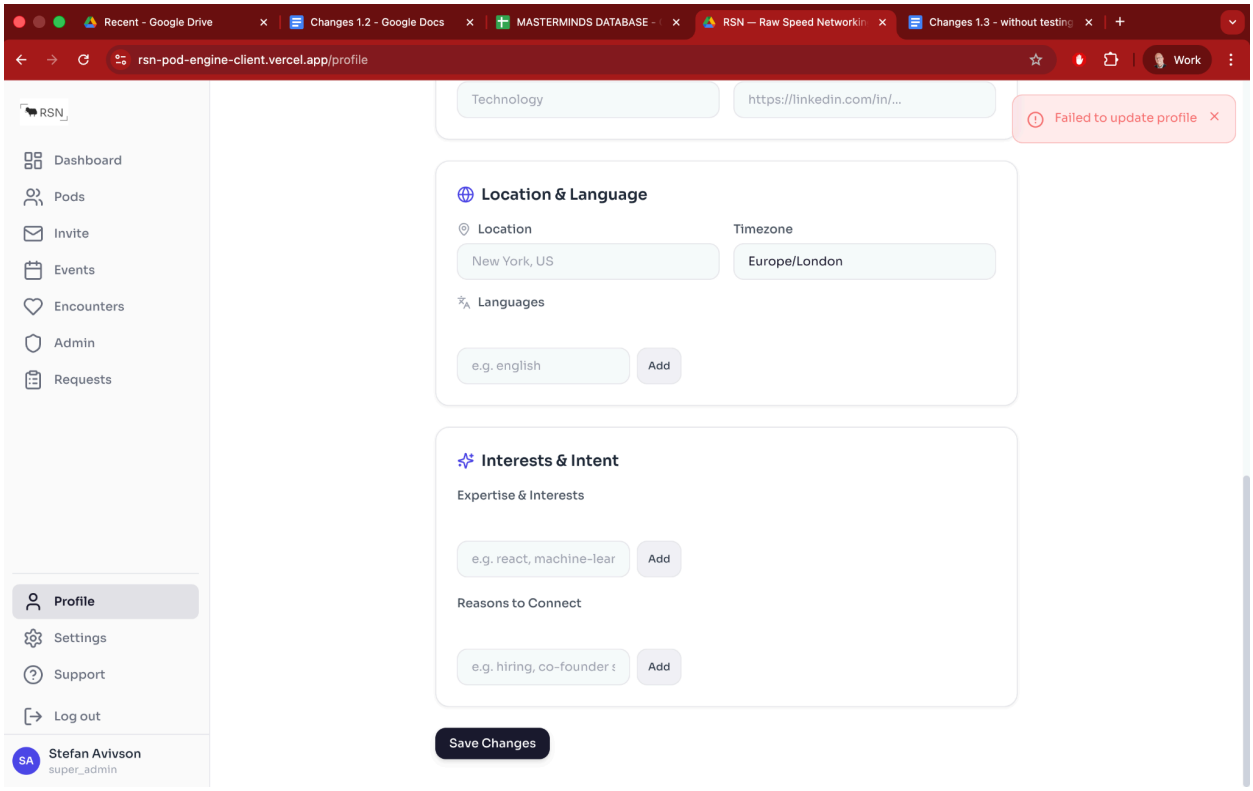


Location and language should be drop downs.
Languages is not important now

Interests and intent, should be “text box” - and whatever people write - that should somehow be indexed in a way, so we can match people with each other.

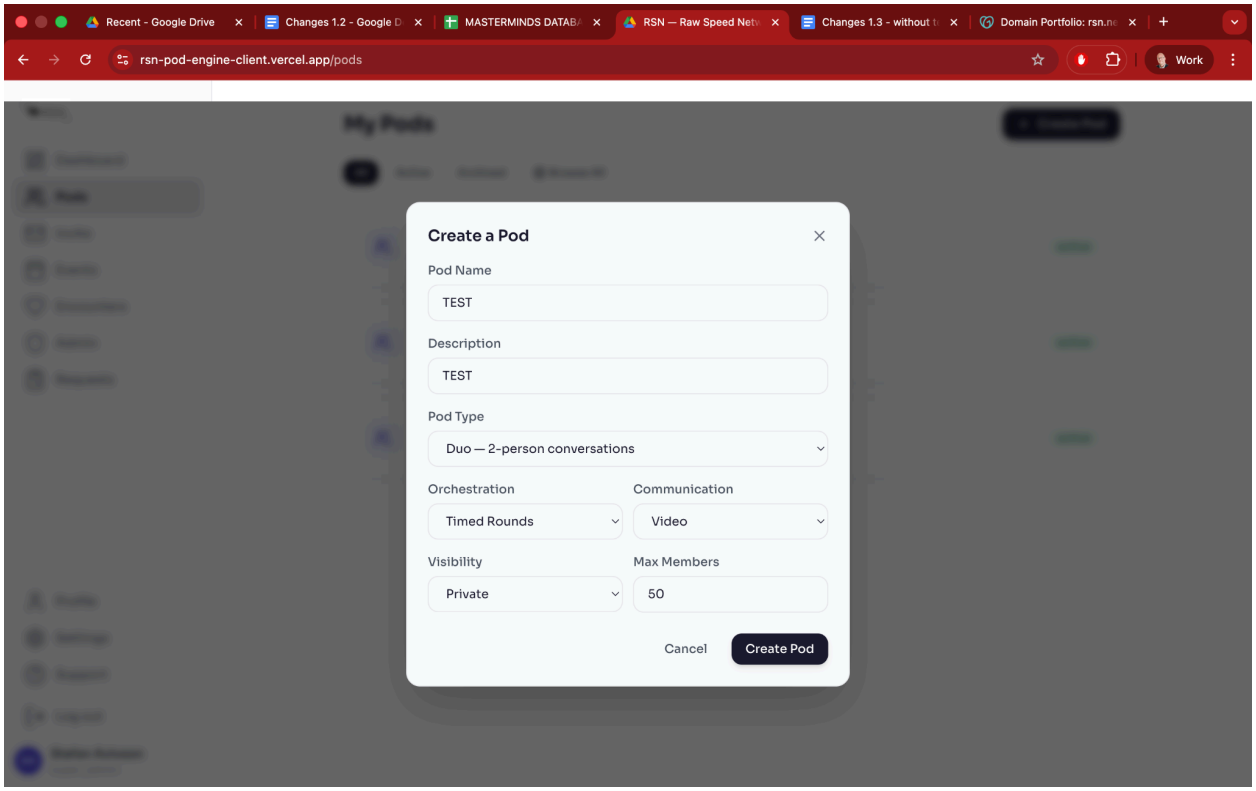


I CAN'T SAVE THE CHANGES I MADE



PODS

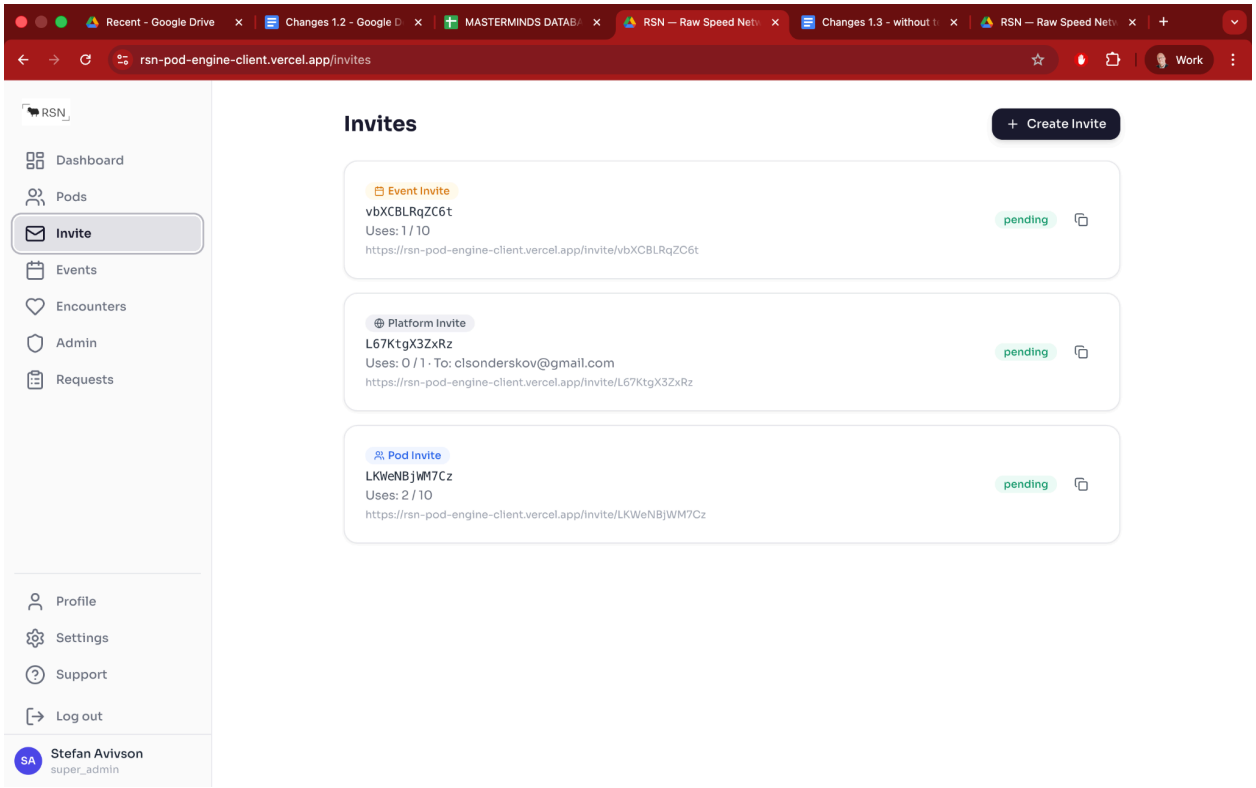
It's "fine" for now - as it needs an overhaul, alongside Circles - BUT I cannot edit or copy a pod... - and just to be sure - as a user, I cannot amend or change other peoples pods, but I can assign more "directors" to one pod.

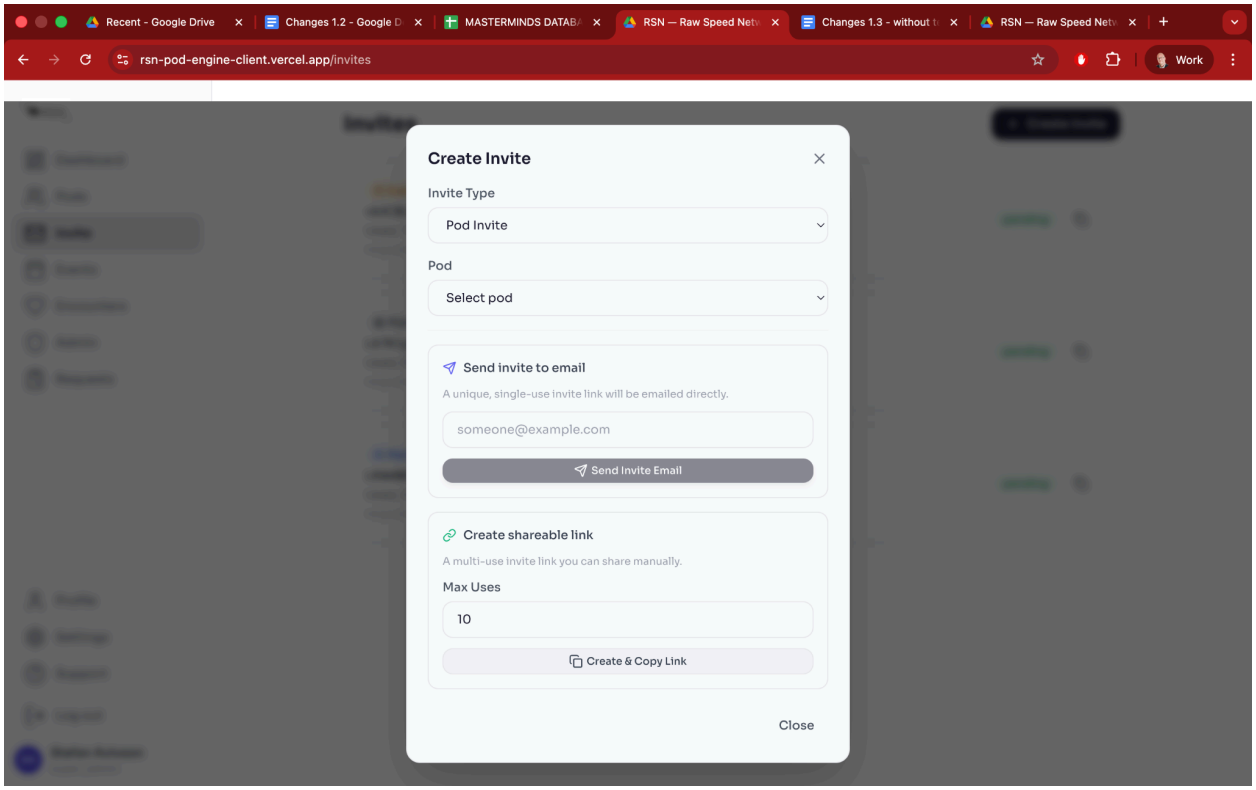


INVITES:

I should be able to see to see WHO I have invited, who is pending, and I should be able to revoke an invitation from one, who has not yet “gone in”

I should be able to put in an email address

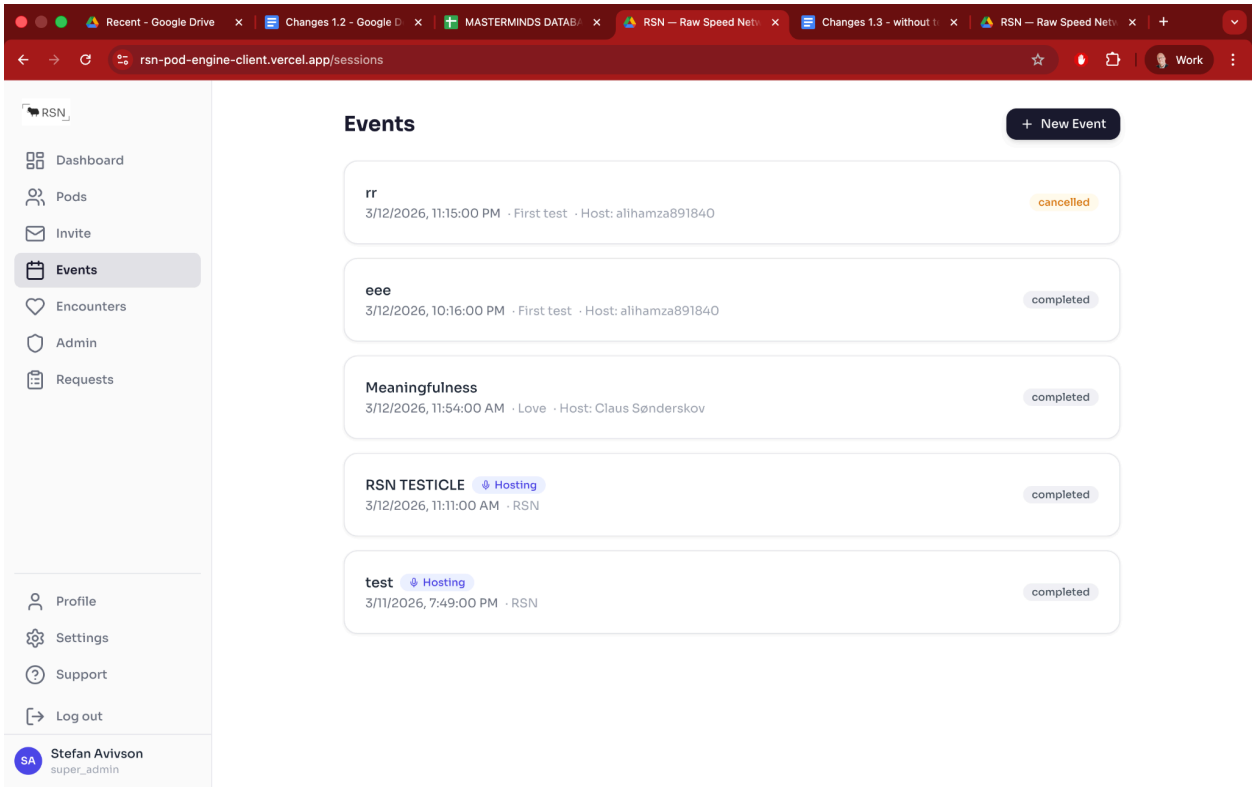




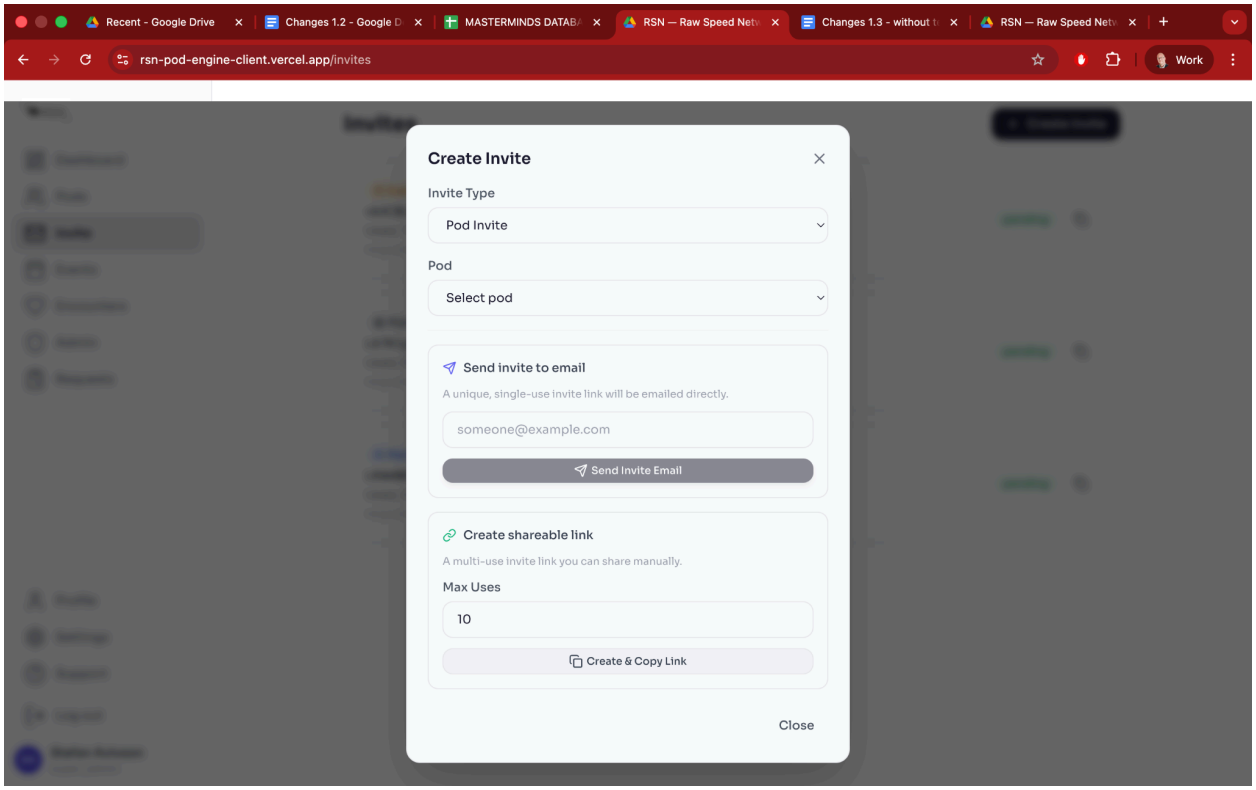
I should be able to put in MORE invites - AND - this popup should simply be on the top - above the actual invites - no reason not to see this immediately, it should be as easy as possible to send an invite.

AND we need a rule... - IF people just send a link to people, “we should accept them” (as i requests) - actually ALL should - in general at this moment, but we will change later, as when a member has become a “trusted member”, then we dont need to “accept” people.

EVENTS



I can’t delete events - and there should be filters, upcoming, completed, cancelled, deleted - for normal users “deleted” events dissappear



I CANNOT CHOOSE a POD - it's broken :)

Also, I cannot invite users from the platform - thats a major problem - i should also be able to filter the users, i choose - as I most likely want to invite bulk - so filter "user preferences", pods, older events -

Also I should be able to copy an event - where you simply "create" a new one - but keep the settings - you know what I mean?
